

DEVANANDANA C

AI/ML Enthusiast • Full-Stack Developer • Computer Science Graduate

Kannur, Kerala | +91 9745026037 | devanandanachandran@gmail.com | linkedin.com/in/devanandana-c

Summary

Fresh B.Tech Computer Science graduate (May 2026) with a strong applied focus on AI/ML and full-stack development. Built an AI-powered surveillance system combining real-time object detection, tracking, and anomaly detection with a natural-language query interface, and a full-stack hospital management system with role-based access control.

Technical Skills

- **Machine Learning / AI:** Deep Learning, Computer Vision (Object Detection & Tracking), Anomaly Detection, PyTorch, OpenCV, YOLOv8, DeepSORT, LLM-based query routing
- **Web Development:** React, Node.js, FastAPI, HTML, CSS
- **Languages:** Python, C, Java
- **Databases:** MySQL (joins, aggregations, subqueries), MongoDB
- **Languages Known:** English, Malayalam, Hindi

Projects

AI Camera Surveillance System

2025

Python, PyTorch, OpenCV, FastAPI

- Built a dual-pipeline surveillance system combining real-time object detection and tracking (YOLOv8 + DeepSORT) with a weakly-supervised anomaly detection pipeline that fuses motion and image data to flag unusual activity.
- Designed a language-model-based routing layer that parses natural language queries and dispatches them to the correct pipeline.
- Built and exposed a FastAPI backend to serve inference results, enabling integration with external tools and dashboards.
- Processed pre-recorded video footage frame-by-frame, balancing detection accuracy against processing speed.

Hospital Management System

2025

React, Node.js, MySQL / MongoDB

- Built a full-stack web application for doctors, patients, and pharmacists to manage appointments, prescriptions, and medication workflows.
- Implemented role-based access control so each user type sees and manages only their relevant data.
- Implemented JWT-based authentication with bcrypt password hashing, and built slot-based appointment scheduling with race-condition safety to prevent double-booking.

Education

B.Tech, Computer Science & Engineering

CGPA: 7.7

Government Engineering College, Idukki — APJ Abdul Kalam Technological University (KTU)

2026

Higher Secondary (Class XII)

97%

AKG Memorial Higher Secondary School, Kannur — Kerala State Syllabus

2022

Secondary School (Class X)

90%

Indira Gandhi Public School — CBSE

2020

Certifications & Achievements

- **GATE 2026 Qualified** – Computer Science & Information Technology (CS), Score: **324** 2026
- NPTEL – C Programming and Assembly Language Oct 2024
- Infosys Springboard – Programming in Java June 2025
